

The Second Medicine & Humanities Interdisciplinary Colloquium

Spring Semester 2019

Organized by: **Dr. Galit Wellner, Prof. Noam Shomron, Prof. Karen Avraham**

Medicine and Humanities share a common research subject – humans. The basic and fundamental difference is the methodologies and research strategies applied, which could lead to similar or opposing conclusions. In the Colloquium, we will examine how the two disciplines approach the same topic, and discuss how the anomalies might contribute to a richer outcome.

- The colloquium will take place in the Spring Semester of 2019 once a month (twice in May) on Tuesdays or Wednesdays, with lecturers from Israel and abroad.
- The meetings will be held at the Jaglom Auditorium, the Senate Building, Tel Aviv University.
- Light breakfast will be served before each meeting, sponsored by the Biomed@TAU Research Hubs & Adelis.
- Lectures will be held in Hebrew unless stated otherwise.
- Attendance is free of charge.
